Debrief Questions for Leadership Development
- VWC

Questions to think about after meetings and conversations for leadership development:

Who participated most in the meeting? Who stepped back?

Who took on leadership roles?

What kind of leadership skills did people demonstrate?

What skills do they need to develop?

Who was excited about what?

Who challenged themselves?

Who demonstrated growth in their leadership skills?

How did people draw on the lessons of our campaign activities?

What kinds of education, tasks and leadership development activities would challenge people to deepen their leadership?

Who has networks they can reach out to? How can we support them?

What are opportunities to spend time with leaders to support their growth and development and deepen the relationship?
